FOREWORD

The provision of quality education and training is fundamental to the Government's overall

strategy for social and economic development. Quality education and training contribute to

the achievement of Kenya's development blueprint and sustainable development goals.

Reforms in the education sector are necessary to achieve Kenya Vision 2030 and meet the

provisions of the Constitution of Kenya 2010. The education sector had to be aligned to the

Constitution, and this resulted in the formulation of the Policy Framework for Reforming

Education and Training in Kenya (Sessional Paper No. 14 of 2012). A key feature of this

policy is the radical change in the design and delivery of TVET training. This policy

document requires that training in TVET be competency-based, curriculum development be

industry-led, certification be based on demonstration of competence, and the mode of

delivery allow for multiple entry and exit in TVET programmes.

These reforms demand that Industry takes a leading role in curriculum development to ensure

the curriculum addresses its competence needs. It is against this background that this

curriculum has been developed. For trainees to build their skills on foundational hands-on

activities of the occupation, units of learning are grouped in modules. This has eliminated

duplication of content and streamlined exemptions based on skills acquired as a trainee

progresses in the up-skilling process, while at the same time allowing trainees to be

employable in the shortest time possible through the acquisition of part qualifications.

It is my conviction that this curriculum will play a great role in developing competent human

resources for the ICT Sector's growth and development.

PRINCIPAL SECRETARY

STATE DEPARTMENT FOR TVET

MINISTRY OF EDUCATION

PREFACE

Kenya Vision 2030 aims to transform Kenya into a newly industrializing middle-income

country, providing high-quality life to all its citizens by the year 2030. Kenya intends to

create globally competitive and adaptive human resource base to meet the requirements of a

rapidly industrializing economy through lifelong education and training. TVET has a

responsibility to facilitate the process of inculcating knowledge, skills, and worker behaviour

necessary for catapulting the nation to a globally competitive country, hence the paradigm

shift to embrace Competency-Based Education and Training (CBET).

TVET Act, CAP 210A and Sessional Paper No. 1 of 2019 on Reforming Education and

Training in Kenya for Sustainable Development emphasized the need to reform curriculum

development, assessment, and certification. This called for a shift to CBET to address the

mismatch between skills acquired through training and skills needed by industry, as well as

increase the global competitiveness of the Kenyan labour force.

This curriculum has been developed in adherence to the Kenya National Qualifications

Framework and CBETA standards and guidelines. The curriculum is designed and organized

into Units of Learning with Learning Outcomes, suggested delivery methods, learning

resources, and methods of assessing the trainee's achievement. In addition, the units of

learning have been grouped in modules to concretize the skills acquisition process and

streamline upskilling.

I am grateful to all expert trainers and everyone who played a role in translating the

Occupational Standards into this competency-based modular curriculum.

COUNCIL CHAIRPERSON

TVET CDACC

ACKNOWLEDGMENT

This curriculum has been designed for competency-based training and has independent units

of learning that allow the trainee flexibility in entry and exit. In developing the curriculum,

significant involvement and support were received from expert trainers, institutions and

organizations.

I recognize with appreciation the role of the ICT National Sector Skills Committee (NSSC) in

ensuring that competencies required by the industry are addressed in the curriculum. I also

thank all stakeholders in the ICT sector for their valuable input and everyone who

participated in developing this curriculum.

I am convinced that this curriculum will go a long way in ensuring that individuals aspiring to

work in the ICT Sector acquire competencies to perform their work more efficiently and

effectively.

COURSE OVERVIEW

Description of the Course

The Software Developer KNQF Level 5 Curriculum equips learners with the technical skills and knowledge required to design, develop and maintain software applications. It comprise of basic learning in entrepreneurial skills and work ethics and practices with foundational units which include discrete mathematics, structured programming, computer operations and project management. Core units of learning include web application development, software system requirements, application end-user support, and computerized database systems. The program emphasizes practical experience through industrial attachment, bridging the gap between classroom learning and industry demands. Graduates are prepared for careers in software development; web applications, database management, and IT end-user support, establish system requirements ensuring their readiness for the dynamic ICT sector.

Entry Requirements

An individual enrolling for this course should have any of the following minimum requirements:

a) Kenya Certificate of Secondary Education (K.C.S.E.) with a minimum mean grade of D (Plain)

b) Related Level 5 certificate

or

c) Equivalent qualification as determined by TVETA

Trainer Qualification

A trainer for any of the units of competency in this course must:

- a) Have a minimum a KNQF Level 6 qualification or its equivalent in a trade area related to this course.
- b) Be registered by TVETA.

Industry Training

An individual enrolled in this course will be required to undergo Industry training for a minimum period of 480 hours in ICT sector. The industrial training may be taken after completion of all units for those pursuing the full qualification or be distributed equally in each unit for those pursuing part qualification. In the case of dual training model, industrial training shall be as guided by the dual training policy.

Assessment

The course shall be assessed formatively and summatively:

- a) During formative assessment all performance criteria shall be assessed based on performance criteria weighting.
- b) Number of formative assessments shall minimally be equal to the number of elements in a unit of competency.
- c) During summative assessment basic and common units may be integrated in the core units or assessed as discrete units.
- d) Theoretical and practical weight shall be 30:70 for each unit of learning.
- e) Formative and summative assessments shall be weighted at 60% and 40% respectively in the overall unit of learning score.

For a candidate to be declared competent in a unit of competency, the candidate must meet the following conditions:

- i) Obtained at least 40% in theory assessment in formative and summative assessments.
- ii) Obtained at least 60% in practical assessment in formative and summative assessment where applicable.
- iii) Obtained at least 50% in the weighted results between formative assessment and summative assessment where the former constitutes 60% and the latter 40% of the overall score.
- f) Assessment performance rating for each unit of competency shall be as follows:

MARKS	COMPETENCE RATING
80 -100	Attained Mastery
65 - 79	Proficient
50 - 64	Competent
49 and below	Not Yet Competent
Y	Assessment Malpractice/irregularities

g) Assessment for Recognition of Prior Learning (RPL) may lead to award of part and/or full qualification.

Certification

A candidate will be issued with a Certificate of Competency upon demonstration of competence in a core Unit of Competency. To be issued with Kenya National TVET Certificate in Software Development Level 5 the candidate must demonstrate competence in all the Units of Competency as given in the qualification pack. Statement of Attainment certificate may be issued upon demonstration of competence in a certifiable element within a unit.

The certificates will be issued by the TVET CDACC.

STRUCTURED PROGRAMMING

ISCED UNIT CODE: 0613 451 06A

TVET CDACC UNIT CODE: ICT/CU/SD/CC/02/5/MA

Relationship to Occupational Standards

This unit addresses the Unit of Competency: Apply Structured Programming

Duration of Unit: 220 Hours

Unit Description

This unit covers the competencies required to apply structured programming. It involves applying computer programming basics, writing program code, implementing program logic and implementing modular programming.

Summary of Learning Outcomes

Learning Outcomes	Duration (Hours)
Apply Computer Programming basics	30
2. Write program Code	40
3. Implement Program logic	70
4. Implement modular programming	80
TOTAL	220

Learning Outcomes, Content and Suggested Assessment Methods

Learning Outcome	Content	Suggested
		Assessment Methods
1. Apply Computer	1.1. Programming Language Types	Practical Activities
Programming basics	1.1.1. Overview of programming	• Project work

PROJECT MANAGEMENT PRINCIPLES

ISCED UNIT CODE: 0688 451 05A

TVET CDACC UNIT CODE: ICT/CU/SD/CC/03/5/MA

Relationship to Occupational Standards

This unit addresses the Unit of Competency: Apply Project Management Principles

Duration of Unit: 110 Hours

Unit Description

This unit covers the competencies required to apply project management principles. It involves executing project initiation, performing project planning, performing project monitoring, and performing project closure.

Learning Outcomes	Duration (Hours)
To execute project initiation	20
2. To perform project planning	40
3. To perform project monitoring	40
4. To perform project closure	10
TOTAL	110

Learning Outcome	Content	Suggested
		Assessment Methods
1. Execute project	1.1. Identification of Project scope	Practical Activities
	1.1. Identification of Project scope 1.1.1. Key Components Listing 1.1.1.1.Project goals and objectives 1.1.1.2. Deliverables 1.1.1.3.Inclusions and exclusions 1.1.1.4. Constraints and assumptions 1.1.2. Scope formulation process 1.1.2.1. Review client or stakeholder needs. 1.1.2.2. Document the project requirements. 1.1.2.3. Define project boundaries 1.1.2.4. Confirm scope with stakeholders 1.2. Determination of Project	Assessment Methods
	deliverables 1.2.1. Internal Deliverables	
	1.2.2. External Deliverables	
	1.2.3. Steps to Determine project	
	deliverables:	
	1.2.3.1. Identifying key	
	outcomes	
	1.2.3.2. Breaking down the	

	project	
	1.2.3.3. Defining milestones	
	1.2.3.4. Clarifying project	
	acceptance criteria	
	1.3. Identification of project objectives	
	1.3.1. SMART Objectives:	
	1.4. Project initiation document (PID)	
	preparation.	
	1.4.1. Key Sections of the PID:	
	1.4.1.1. Project Purpose	
	and Justification	
	1.4.1.2. Project Scope	
	1.4.1.3. Project Deliverables	
	1.4.1.4. Project Objectives:	
	1.4.1.5. Stakeholder Analysis	
	1.4.1.6. Project Organization	
	1.4.1.7. Project Timeline and	
	Milestones	
	1.4.1.8. Budget and Resource	
	Plan	
	1.4.1.9. Risk Assessment	
	1.4.1.10. Quality	
	Management	
	1.4.2. Importance of the PID:	
2. Perform project	2.1. Preparation of Project budget	Practical Activities
planning	2.1.1. Steps of preparing budget	Project work
	2.1.2. Budgeting techniques	Demonstration
	2.2. Determination of Project schedule	• Group Work

WORK ETHICS AND PRACTICES

ISCED UNIT CODE: 0417 441 02 A

TVET CDACC UNIT CODE: ICT/CU/SD/BC/02/5/MA

Relationship to Occupational Standards

This unit addresses the Unit of Competency: Apply work ethics and practices.

Duration of Unit: 40 hours

Unit Description

This unit covers competencies required to apply work ethics and practices. It involves the ability to: conduct self-management, promote ethical work practices and values, promote teamwork, manage workplace conflicts, maintain professional and personal development, apply problem-solving, and promote customer care.

Summary of Learning Outcomes

Learning Outcomes	Duration (Hours)
To apply self-management skills	10
2. To promote ethical practices and values	4
3. To promote teamwork	10
4. To maintain professional and personal development	10
5. To apply problem-solving skills	4
6. To promote customer care.	2
TOTAL	40

Learning Outcomes, Content, and Suggested Assessment Methods
